After Image, Kreon, 2013

Juan Davila *After Image*

New paintings and works on paper.

Drawing on late capitalism, psychoanalytic discourse, notions of beauty and modernity, Juan Davila's new paintings suggest a gaze that is not trapped in consumerism. His device is called the 'after image' - the trace that remains as a distillation of reality that we

do not control. The colours, lines, figures and traces of things are like those from a dream.
